PROFESSIONAL SUMMARY

Cloud / DevOps Engineer and Cloud Architect with 12+ years of engineering experience (software development, DevOps and cloud) and hands-on experience leading cloud-native platforms on AWS and Kubernetes (EKS). Specialized in GitOps (Argo CD), Infrastructure as Code, CI/CD, observability, and building Internal Developer Platforms (IDP) that accelerate delivery and standardize the work of multiple teams. Proven experience leading technical teams, defining platform standards and cloud governance, and optimizing cloud costs. Strong software engineering background (Java / Spring Boot) that brings an end-to-end view of the application lifecycle.

TECHNICAL SKILLS

Cloud: AWS (EKS, ECS/Fargate, Lambda, Transit Gateway, S3, RDS, ElastiCache, SNS, SQS, Service Catalog, Organizations)

Containers & Orchestration: Kubernetes, Amazon EKS (Auto Mode and self-managed Karpenter), Helm, Rancher, Docker

GitOps & CD: Argo CD, ApplicationSet, App of Apps pattern, Kyverno

CI/CD & Automation: Jenkins, CI/CD pipelines, GitOps, deployment automation

IaC & Platform: Infrastructure as Code, Kubernetes Operators / CRDs, Internal Developer Platform (IDP)

Observability: New Relic, metrics, alerting and monitoring

Development: Java, Spring Boot, Spring Cloud, Spring Security, microservices, REST/SOAP, Apache Camel

Practices: Cloud-native architecture, cost optimization, standards & governance, technical leadership and mentoring

PROFESSIONAL EXPERIENCE

Itti Digital

Expert Cloud

Apr 2025 – Present

- Lead and technically coordinate multiple teams and leads, defining platform standards, cloud governance and cross-cutting cloud-native practices.
- Administer and operate a centralized Argo CD using ApplicationSet and the App of Apps pattern to manage base software under GitOps: controllers, Kyverno and observability.
- Implement GitOps workflows for the Kubernetes base software and enable application deployments through the Internal Developer Platform (IDP), integrating Argo CD into the delivery flow.
- Evolved Traffic Manager operations from an imperative, cluster-specific approach to GitOps via a custom CRD and Kubernetes Operator that reconcile declarative configuration.
- Administer Amazon EKS in Auto Mode and EKS with self-managed Karpenter: NodePool and NodeClass, provisioning strategies, upgrades and internal/external pod networking.
- Perform architecture reviews, cloud cost optimization and standardization of reusable patterns across multiple squads.

Tech Lead DevOps

Feb 2024 – Mar 2025

- Led the DevOps team: CI/CD pipeline design, deployment standards and automation.
- Built a migration framework to centralize the Developer Experience within an Internal Developer Platform (IDP) and enable cloud-native refactors.
- Kicked off and scaled AWS adoption: created the AWS Organization, corporate network topology and a hub-and-spoke architecture with AWS Transit Gateway.
- Migrated and ran workloads from ECS/Fargate to Amazon EKS, working with self-managed Karpenter, EKS Auto Mode, Spot nodes and AWS Lambda adoption.
- Implemented a Service Catalog for self-consistent deployments (S3, RDS, ElastiCache, SNS, SQS) and observability with New Relic, including metrics, alerting and engineer mentoring.

DevOps / Software Engineer

Sep 2023 – Feb 2024

- Transitioned from Software Developer to DevOps: defined and implemented CI/CD processes and containerization.
- Managed Kubernetes deployments (Rancher), Helm, kubectl and automation with Jenkins.

Software Engineer
Mar 2022 – Aug 2023

- Designed, developed and maintained applications with CUBA Platform and microservices with Spring Boot.
- API Gateway with Spring Cloud and Spring Security; integration with Eureka, Docker, Jenkins and test/deployment automation.

Visión Banco S.A.E.C.A.

Java Programmer
Sep 2015 – Feb 2022

- Developed and integrated components to specification; REST/SOAP services with Apache Camel, JBoss and version control with Git.
- Built web services with Spring Boot and Android mobile development.

BI Data Analyst
Jan 2014 – Sep 2015

- Modeled and built reports for executive decision-making.
- SQL and stored procedures on AS/400; multidimensional modeling (star/snowflake), cubes and reports in IBM Cognos.

EDUCATION

National University of Asunción — Bachelor's Degree in Computer Science (emphasis in Computer Programming)

Class of 2019

CERTIFICATIONS & COURSES

- AWS Certified Solutions Architect – Associate (SAA), 2026
- The Linux Foundation — Kubernetes and Cloud Native Associate (KCNA), 2025
- National University of Asunción — Teaching Skills for Higher Education, 2022
- Red Hat Training — Switchyard Development with Red Hat JBoss Fuse Service Works, 2015
- National University of Asunción — Data Warehouse Course, 2015

LANGUAGES

Spanish: native

English: intermediate (B1)
